EDUCATION

Texas State University

San Marcos, TX

B.S. in Computer Science

Graduation Date: December 2025

Awards & Honors: National Society of Collegiate Scholars | Phi Theta Kappa | Dean's List

WORK EXPERIENCE

Stellar AI

January 2025 – February 2026

AI Model Tester and Validation Analyst

Remote

- Evaluated **agentic AI models** across multiple test sessions, authoring tailored task instructions and scoring outputs against defined success criteria to raise measured task accuracy by **18%**.
- Analyzed sample batches and documented reproducible failure scenarios, improving AI-driven GitHub issue resolution speed and accuracy by **20%**.
- Authored technical specifications for **10+ GitHub issues**, enabling AI models to reliably reproduce complex virtualized-environment bugs and streamline automated troubleshooting.

PROJECTS

Custom Carpentry E-Commerce Platform

May 2026 – Present

ReactJS, NodeJS, ExpressJS, MongoDB, Stripe | [Website](#) | [Source Code](#)

- Engineered a full-stack **MERN** e-commerce application with dynamic **REST API** routing for product-isolated user reviews, integrating Multer with Vercel Blob for cloud-hosted media uploads.
- Integrated the **Stripe Checkout API** to process catalog attributes and prices into secure payment sessions.
- Deployed a unified monorepo to **Vercel** with serverless API rewrites, SPA fallback routing, and AI-assisted backend middleware optimization.
- Directed **Claude Code** through the deployed repository to author architecture and coding-style documentation that preserves decision context across future development sessions, then executed an AI-guided visual overhaul of the UI against a supplied design reference while maintaining consistent coding styles.

LoopStudios Landing Page

Completed

React, TypeScript, Tailwind CSS | [Website](#) | [Source Code](#)

- Developed a fully **responsive UI** with hover and active interaction states, mobile-optimized dropdown behavior, and breakpoint-driven layouts for consistency across all screen sizes.
- Implemented dynamic UI features using **React hooks** (useState, useEffect), including a typewriter-style page-load animation.

TECHNICAL SKILLS

Languages: HTML5, CSS3, TypeScript

Developer Tools: Git, GitHub, Vercel, VSCode, Figma, Vite

Libraries/Frameworks: ReactJS, NodeJS, ExpressJS, MongoDB, Tailwind CSS, Stripe API
